

## How to set Adobe Reader as the default PDF viewer

1. Look for a PDF file (any PDF file). Right click this PDF file to show the sub-menu as below. Choose "Open with" to open another sub menu, then choose "Choose another app"

2. It open the menu below,

Frist, tick the box "Always use this app to open .pdf files", then click on "Adobe Reader", then click "OK"

3. The icon of your pdf file will change to this,

Which mean you have successfully change the default viewer to Adobe Reader.

4. You can try to print a pdf file now.
